

COMPANY

Pampa Fish is a processing and exporter company of frozen fish from the Argentine Sea since 2006. Our processing plant is located in Mar del Plata, the most important fishing port of the country.

VISION

To be recognised by our customers and the whole market as the best supplier of value-added fish products of Argentina; and to be leaders in creating a new market for the fish industry, by the implementation of advanced technologies.

Ensure a better and excellent service to our customers, through research into new technologies for processing the raw material, the development of products that can create competitive advantages, and commercialisation of these to achieve a continued growth, based on teamwork and policy of customer loyalty.

VALUES

Our working philosophy is to perform our tasks responsibly, offering high quality products.
Our commitment is reflected on the trust from our customers, who provide the best references globally.

CERTIFICATIONS

We have the following certifications

Hazard Analysis Critical
Control Point (HACCP)

Good manufacturing
practices (GMP) and
Sanitation Standard
Operating Procedures
(SSOP)

Our Processing plant complies with US FDA Requirements and is under the EU
Directives for the European market.
