

WHO WE ARE

The National Fishing Society (SONAPESCA) FG was founded in March 2015 as an organization aimed at promoting the development of industrial fishing. In this way, the trade federation plays a leading role, due to the importance of the sector in the economic, social and cultural growth of each of the fishing regions.

Today, the sector faces new challenges. For this reason, SONAPESCA and the associations that comprise it throughout the country must have an active participation in the decision-making processes to jointly address the important challenges of the sector, collaborating with the sectoral authorities to recover the fisheries and strengthen the new institutional framework.

SONAPESCA promotes and encourages, through the joint efforts of all fishing regions, Responsible and Sustainable Fishing, which allows for the conservation of marine resources; the environment; scientific and technological development; food security; the health of people and the well-being of their workers, among others, in addition to the contribution that companies make to the country through economic growth.

MISSION

VISION

GOALS

VALUES

STRATEGIC PLANNING

At the National Fishing Society, a trade federation that brings together the main trade unions and actors in the country's industrial fishing industry, we are committed to contributing all our skills, resources and efforts to making Chile a fishing power respected in the world for the quality of its policies and the transparency of its actions.
