There is nothing good. Stone Age. Hopelessness and darkness.

One of the most dynamically developing companies in the Kuril Islands. Aimed at providing high-tech, efficient and environmentally friendly processing of fish products and the release of competitive products. Provides great assistance in preserving and breeding the salmon population.

It used to be a city-forming enterprise. Now its importance in the district economy has decreased. Its activities are concentrated around fish processing and port works. Sometimes it participates in socially significant events, such as helping to create eco-trails. The construction of a fish-breeding plant has increased its social importance somewhat.

Very good company. Very good management. Salary without delays. Normal supplies. In a word, you can work with confidence.

They pay little, demand a lot, treat people like slaves, it's hard to leave this island, it's a hole... Low wages!!!

I've been on the island for 8 years and I'm constantly developing. The sailors praise the place of work. It will be a pity if the island is given to the Japanese after all😭😭😭

Fish processing plant on Kunashir Island. Salary is paid on time, the amount is above average. Working conditions are acceptable.
