

Fishing

Our vessels catch and process about 35-40 thousand tons of fish per year. Fishing is carried out in the waters of the Bering Sea, the Sea of Okhotsk, and the Pacific Ocean. The main objects of fishing are saury, herring, and pollock. Every year, the company's vessels are put out to receive salmon on the coast of Kamchatka and Sakhalin.

Fleet

The company's vessels are based at its own berthing complex in Vostok Bay.

It has 2 stationary refrigerators with a capacity of 5000 and 500 tons. Saury, pollock, and to a small extent herring and salmon are caught and processed, and kelp and trepang are bred on a 320-hectare mariculture coastal area.

It's not an easy job

During the fishing season, seiners and floating factories work around the clock to catch and process fresh wild fish.

The company has always been famous for its personnel — people who have been creating Yuzhmorrbflot for decades, professionals who have worked and continue to work, developing the company's potential. Thanks to the well-coordinated work of the team, it was possible to maintain the continuity of the company — the quality of the products manufactured by Yuzhmorrbflot remains consistently high and in demand.
