Türkiye's fish oil and meal exports increased by 57 percent

In the January-October period of the year, 26,109 tons of fish oil and meal were exported from Türkiye to 32 countries, generating an income of 45 million 360 thousand 603 dollars.

Meltem Yılmaz Karakorum | 14.11.2020 - Update: 14.11.2020

Trabzon

Fish oil and meal exports from Turkey in the first 10 months of the year increased by 57 percent compared to the same period last year, reaching 45 million 360 thousand 603 dollars.

According to the compilation made by AA correspondent from Eastern Black Sea Exporters' Association (**DKİB**) data, 26,109 tons of fish oil and meal were exported from Turkey to 32 countries in the January-October period of the year, generating 45 million 360 thousand 603 dollars in revenue in return.

In the same period last year 28 million 866 thousand 620

In the same period last year, 20 million 600 thousand 620 dollars of profit was obtained from the export of 18 thousand 200 tons of fish oil and meal from the country. Thus, fish oil and meal exports from Türkiye increased by 43 percent in quantity and 57 percent in value compared to the same period last year.

Fish oil and meal exports to Peru increase by 807 percent

In the January-October period of the year, Peru, France and Norway were the countries with the highest exports.

5,707 tons of fish oil and meal were exported to Peru in the first 10 months of the year, generating a profit of 11 million 112 thousand 65 dollars.

In the same period last year, 614 tons of fish oil and meal were exported to Peru, generating \$1,224,923 in revenue. Thus, fish oil and meal exports to **Peru** increased by 829 percent in quantity and 807 percent in value compared to the same period last year.

Peru was followed by France with a share of 8 million 39 thousand 154 dollars and Norway with a share of 7 million 42 thousand 649 dollars.

Fish oil and meal were also exported from Türkiye to Taiwan, Indonesia, Germany, Russia, Serbia, Oman, the Netherlands and Kyrgyzstan, to which no exports were made in the same period last year.

"We believe that fish oil and meal exports will provide much more added value"

DKİB Board Member and Head of the Fisheries Sector Committee İsmail Kobya told AA that Türkiye has significant potential in aquaculture exports.

Emphasizing that the export of fish oil and flour, which are aquaculture products, is also improving every year, Kobya said that the exports in question increased by 57 percent compared to the same period last year.

Kobya underlined that the country's diversity has increased as well as the export potential, and stated that they believe that fish oil and meal exports will provide much more added

that fish oil and meal exports will provide much more added value to the country in the future.
