"Trafficking in persons" shall mean the recruitment, transportation, transfer, harbouring or receipt of persons, by means of the threat or use of force or other forms of coercion, of abduction, of fraud, of deception, of the abuse of power or of a position of vulnerability or of the giving or receiving of payments or benefits to achieve the consent of a person having control over another person, for the purpose of exploitation. Exploitation shall include, at a minimum, the exploitation of the prostitution of others or other forms of sexual exploitation, forced labour or services, slavery or practices similar to slavery, servitude or the removal of organs.

CMM would not apply to the territorial waters – no matter which three options for para 1. If not the case – KR would need to reserve the right to introduce a new position of change its existing position.</li> <li>LGL (Penny Ridings): Understanding is that WCPFC CMMs do not normally apply to the TS. Convention Area is very broad – difficulty between the text of the Convention and the understanding that the Convention Area does not normally apply to the TS. To ensure it is absolutely clear – useful to have in the CMM a specific exclusion for TS and AW – that would make it very clear with no ambiguity. Or have that understanding as part of the meeting record to help with the interpretation.</li> <li>KR: Can go along with either two options. Will consider a specific text by next meeting.</li> <li>ID: Agree on specific exclusions relating to territorial seas.</li> <li>CN: Flexible – but prefer that CMM only cover HS. FFA already has regulation for crew standards in EEZs, as a condition for licenses. If the CMM only deals with labour standard on HS then this would reduce the workload for all CCMs.</li> <li>US: Some flexibility on options. But strong preference is that EEZ should be included – live with OP1 or 2nd ALT. Do not prefer 1st ALT. Important for US to have some applicability to EEZs.</li> <li>KR: para (iv) of 2nd ALT – this is not a category – more appropriate to have as a stand alone para.</li> <li>US: fine to have as a stand alone para – this para comes from para 2 of the observer safety measure (CMM 2017-03].</li> <li>JP: flexible with the three options. Option 1 is clear – recognises which vessels are subject to the obligation – can check with the WCPFC RFV. Other two options could be workable. If focus on HS – then ALT 1 could be candidate. CMM 2018-06 - Conservation and Management Measure on the Record of Fishing Vessels and Authorization to Fish | Monitoring and Evaluation (wcpfc.int) Para 12: The Commission shall, in accordance with article 24(7) of the Convention and based

on the information provided to the Commission in accordance with the Convention and these procedures, establish and maintain its own record of fishing vessels authorized to fish in the Convention Area *beyond the national jurisdiction* of the member of the Commission whose flag the vessel is flying. Such record shall be known as the WCPFC Record of Fishing Vessels (the "Record")

HS OR HS & EEZ. But also need to focus on
what kind of vessels are covered by the CMM.
CT prefer that only include vessels on the
WCPFC RFV – i.e. OP1. On US test (ALT 2) –
have similar ideas – but will consult to check
common understanding of the intention and
what vessels would be covered.
<b>CN</b> : Similar view to JP – if vessel operating only
in its own jurisdiction, then it should be
excluded. Just as for VMS. With regard to OP1
and reference to WCPFC RFV – more than 60
Chinese vessels on RFV which only operate in
China's EEZ. So would have difficulty with that
reference.
PNG FIA: 2nd ALT is ideal. Need to consider
crew being transported by FVs in different
parts of the Convention Area. Noting also
reference to migrant workers.
ID: Clarify ALT 2 whether CCM fit in either
category or in all categories?
US: Clarify – don't pick amongst the options –
the CCM would apply to any vessel operating
in any one of those categories (i.e. if a vessel
fishes only in HS, the CMM would apply; if the
vessel fishes in HS and in 1 or more EEZ, the
CCM would apply; if the vessel fishes in 2 or
more EEZs, the CCM would apply).

suggestions that incorporate previous U.S.
proposals. We would like to offer the
following editorial suggestions to further
clarify the text and also address the
concern regarding territorial and

We also believe the footnote needs clarification, as there would be persons on a vessel who are not crew.</li> <li>In order to give effect to this Measure, In addition to the requirement of this measure, CCMs are encouraged to make every effort to have relevant national legislation which fully extends to all crew* members working on fishing vessels flying their flag in the areas set out in paragraph 1.</li> <li>*Footnote 1: Crew includes all-persons of any age on board a fishing vessel.</li> </ul> Global Law Alliance: strongly agrees with the retention in paragraph 2 of footnote 1 and its inclusion of persons of "any age." This ensures that whatever a State has adopted as the age requirements for employment on a fishing vessel that the standards apply.	
3	In addition to the requirements of this measure, CCMs may adopt legally binding mechanisms, such as licensing conditions, for vessels fishing solely within its exclusive economic zone.	<ul> <li>CN: It is OK that a CCM "may" adopt legally binding mechanisms. But "may" is difficult for an Audit Point – propose that "may" is changed to "shall" – to make this obligation compulsory. To implement this measure, CCMs should have a legal mechanism. In addition, a missing element is the focal point for each CCM. In order to implement this CMM, each CCM should notify to the Secretariat a contact point. As labour standards are a new issue, existing contact points for each CCM may not be appropriate.</li> <li>JP: This para is in relation to those vessels</li> </ul>	<ul> <li>CN: 3: Para 3 is linked with area of application. But if WCPFC decides to exclude vessels operating exclusively in EEZ – then the language should only be "may".</li> <li>US: 3: If it is decided that vessels fishing solely in EEZ are included in the CMM, then para 3 is not needed. Para 3 is only necessary if we exclude vessels which fish solely in their own EEZs. Para 3 is an encouragement for CCMs to do something with those vessels in zone. 	fishing solely within an EEZ. This is outside of	on para 2 & 3.	
	the scope of para 1. Para 3 exists to address		
	those vessels – so amending the para to "shall"		
	would not work. "Encourage" or "may adopt"		
	is suitable. Japan would like to maintain this		
	para as "may".		
	CT: Echo Japan's comment – a similar		
	understanding of para 3. It relates to fishing		
	solely within an EEZ – it should not be a binding		
	obligation - "may" should suffice.		
	obligation - may should suffice.		
	<b>CN:</b> Thanks for the Japan and the Chinese		
	intervention. If that is the intention, the		
	paragraph should be amended: "in order to		
	give effect to this measure, for vessels fishing		
	solely within its EEZ, CCMs may adopt legally		
	binding mechanisms, such as licensing		
	conditions". Giving effect to international		
	instruments is very wide. This would make it		
	more clear.		
	ID: Seek clarification on this para - does it		
	mean for vessels fishing solely within its EEZ		
	that there is an exemption from this measure,		
	but they have to adopt a legally binding		
	mechanism?		
	<b>Co-Chair</b> : Commented that para 1 provides for		
	vessels fishing exclusively on high seas, vessels		
	fishing on high seas and EEZs, and vessels		
	fishing in 2 or more EEZs – but the CMM does		
	not cover vessels fishing exclusively in one EEZ.		
	Para 3 provides for that situation.		
	JP: China's suggestion should be subject to		
	further consideration. Japan's preference is to		
	maintain the para as originally proposed by the		
	co-Chairs. If China still has concerns, another		
	way may be to delete the first part of the		
	sentence, "in addition to the requirements of		
	this measure". It would then just say that		
	"CCMs may adopt legally binding mechanisms,		
	such as license conditions, for vessels fishing		
	solely within an EEZ". The phrase "in addition		
	to the requirements of this measure" may be		
	confusing given that fishing solely within an EEZ		
	is outside of the scope of the CMM. The para		
	would encourage CCMs to take compatible		
	measures for fishing solely within its EEZ.		
	<b>CN</b> : Agree with Japan's suggestion – para 3 can		
	be simple.		
	US: Think that "in addition to the		
	requirements of this measure" came from the		
	US originally. If the preference is to remove

These conditions include: CCMs shall ensure that owners and/or operators of fishing vessels covered by this measure:	<ul> <li>US: Japan and the United States trying to accomplish the same thing. We are comfortable with either language. They are both trying to do the same thing. Whatever is decided here, should then be used again later (e.g. para 5).</li> <li>JP: Can go along with the US suggestion. Having this kind of provision for each paragraph could create confusion in the latter part of this CMM. Maybe one paragraph could cover all of the elements in this CMM. The scope of the CMM is clearly defined in paragraph 1. Do not need additional language, such as "subject to paragraph 1" in paragraph 4. With regard to "CCMs shall ensure that owners and/or operators of their fishing vessels authorised to fly their flag" – we just need a simple explanation. If use same language as in paragraph 1, this could create complexity in the text.</li> <li>Co-Chair: Will consider possible language – we are in agreement on the scope of the CMM as set out in para 1 – we may not need to reiterate that scope in every subsequent paragraph – we could go with a simpler chapeau. {See new simpler chapeau proposed by co-Chairs].</li> </ul>	<ul> <li>JP: The new inserted text, "fishing vessels authorized to fly their flag in the areas referred to in paragraph 1" is not consistent with the language in paragraph 1. So, we suggest slight modification: "fishing vessels flying their flag and subject to paragraph 1" Or "fishing vessels flying their flag and authorized to fish in the Convention Area as specified in paragraph 1"</li> <li>US: We have some concerns with the new text proposed by the Chairs' and would like the text to read as follows: "CCMs shall ensure that owners and/or operators of fishing vessels authorized to fly their flag operating in the areas referred to in paragraph 1:"</li> <li>[Note if the above change occurs, sub - paras would revert to "provide", ensure", etc. ]</li> <li>Global Law Alliance: The changes to the chapeau of paragraph 4 help clarify the paragraph.</li> </ul>	JP: Japan still prefers to maintain this text areas beyond national jurisdiction", pendin the text in the paragraph 1. 4 (ii)	<ul> <li>(ii) Ensure there is no forced or compulsory labour and other mistreatment on fishing vessels.</li> </ul>		See proposed Attachment 2 for definitions. Global Law Alliance: The revisions to paragraph 4(ii) are excellent.	JP: With regard to "involuntary or compulabour", Japan suggests using a consistent phrase throughout this CMM.

4 (iii)	(iii)	Provide terms of employment, that are set out in a written contract or agreement, which is made available to the crew member, in a form and language that facilitates the crew member's understanding of the terms, is agreed by the crew member prior to departure on the fishing trip, and signed by both the crew member and the owner and/or operator. The written contract or agreement shall be made available to the crew member and, upon request, authorised officers, in accordance with national law and practice. A CCM may allow the owner and/or operator to use the particulars in Attachment 1 as a guideline for crew contracts or agreements.	JP: Generally fine with co-Chair's proposal – but some duplication with regard to making the contract available to the crew member. Suggest that the first reference to "which is made available to the crew member" is deleted, since this is addressed in the 2nd sentence.	<ul> <li>CN: (iii) regarding contract or agreement with crew member. Chapeau relates to owner and/or operator of FV. Difficulty because have non-national crew – over half of the crews operating in the WCPFC area. The contract is therefore between non-national crew and the manning company, located in the source country for the crew. The flag State cannot deal with that company located in another country. Contract is signed between crew and manning company – always a problem for the flag CCM. This obligation should be a joint obligation between the flag CCM and the CCM where the manning company is located. Important element for this delegation.</li> <li>CN: (iii): (i) and (ii) are obligations for the flag State as the crew are operating on the vessel. But problem with (iii): flag CCM cannot manage the manning company which is located in another country. The crew's contract is with the manning company.</li> <li>US: (iii): Understand the point that China is making. But, as noted before, at WCPFC we can only bind the member countries to WCPFC CMMs. So flag States can make requirements for the vessels that we flag – even if there is a manning company involved. We can still require the Capt and the owner of the fishing vessel to have obligations for the crew contract/agreement. Recognise the existence of manning agencies – but they are not bound by WCPFC. Need to focus on what we can actually bind. Important element of protecting the crew on vessels. Some questions relating to "employer" terminology. Need to focus on the flag State and what we can manage under WCPFC.</li> <li>CN: (iii): Understand US. Not removing (iii). Noted China's new regulation relating to nonnational crews on China flagged vessels. Have already requested vessel owner and/or operators to do this. This is no problem. 		US: (iii): Important point. No such thing as manning CCM in WCPFC Convention, UNCLOS	
		or elsewhere. This is the responsibility of the	
		flag State – responsibility of owner/operator to	
		do right thing for their crew. As flag States, we	
		can put requirements in place for	
		owners/operators related to the manning	
		companies. There are no manning CCM at	
		WCPFC – there is no ability to bind them	
		through WCPFC CMMs.	
		<b>CN:</b> (iii): Understand that it is the obligation of	
		the flag State. Our legislation has already set that. But if the flag State ask the	
		owner/operator to carry the responsibility, and	
		the crew enter onto the vessel – but do not	
		have a written contract or do not understand	
		the terms of the contract (with the manning	
		company). How do we make a judgment?	
		Who has the power? That is why we think it	
		should be a joint obligation. Based on current	
		international law, we know there is no	
		reference to a manning company. But since	
		we are talking of a new measure, we need to	
		create the term relating to manning company – otherwise this new measure will be

But there was negative feedback on this from other CCMs. Looking for a way to address this issue. Before the crew embark on the fishing vessel, there must be training. Also the contract is between the crew members and the crew provider (1st contract) – the crew provider then makes a contract with the fishing companies. This first contract is the focus of new para 6.</li> <li>WCPFC Legal: It is a bit awkward to provide a response to this proposal by China before CCMs have had an opportunity to provide their views. A few comments from a legal perspective. There are references to crew providers in the text, but there is no definition of what precisely a crew provider is. Some assistance can be gained from the ILO Convention C. 188, as well as the Maritime Labour Convention. CCMs might consider drawing on those Conventions if they decide to have a reference to crew providers. China has referred to article 23 (5) of the WCPFC Convention, which is known as the "nationals" provision. It provides that "each member of the Commission shall, to the greatest extent possible, take measures to ensure that its nationals and fishing vessels owned or controlled by its nationals fishing in the Convention". This provision is used by a number of countries to look at those nationals that are controlling fishing vessels – in a way, it is in addition to the flag State jurisdiction. As mentioned by the US and RMI during the last workshop, the UNCLOS, as well as the WCPFC Convention, place responsibility on the flag</li> </ul>	CN: new proposal.

It would be more practical to require the flag CCM to report to the Secretariat, rather than the owner/operator of the fishing vessel. Also requiring this within one week is a tight timeframe, considering the circumstances of the crew members' death – they may not be conducting a rescue or search mission that requires the Secretariat's coordination. Suggest a requirement in para 6, in the event a crew member dies, the flag CCM shall ensure that the owner/operator inform the Secretariat as soon as practicable.</li> </ul>	JP: chapeau/(b): Prefer that "must be reported to the Secretariat" should be deleted from the para. During a crucial emergency situation – the vessel and relevant flag authorities are busy. The information can be reported to the Secretariat on annual basis (in an annual report) – rather than immediately during an emergency event – this is not practical. JP: (e): Japan's domestic regulation and also international regulations allow for dead bodies to be buried at sea – in case of epidemic disease. [(f) CT: delete: <u>informs the</u> Secretariat of the death of a crew member and circumstances within one week.] **Co-Chairs comment:** As a result of CN and CT comments, there remains a question as to who should inform the Secretariat as soon as practicable? The flag CCM or the owner and/or operator of the vessel? If the former, then it should be CT's amendment to the chapeau. If the latter, it should be an amendment to para (f): informs the Secretariat of the death of a crew member as soon as practicable.

not want the body transferred back home, given the cost. Important to keep the reference to burial at sea if requested by the next of kin, and confirmed by the manning company which has a contract with the crew member. This is the current practice.

**US**: chapeau/(b): Keep language about reporting to the Secretariat – this is consistent with measure for observer safety CMM 2017-03 para 6. No reason why there should be a different notification requirement for crew members. Fine to require further notification from flag CCM in the annual report. It is general practice to notify the Secretariat (e.g. HSBI, observer safety). The report does not need to be burdensome – there is no temporal element (i.e. it does not need to be an immediate report) - there is some flexibility if the vessel operator is busy dealing with the crew death. In any case, it is hoped that crew deaths are infrequent - so it should not be a large burden.

**JP:** chapeau/(b): There are only one observer on board; but there are many crew on board and some are quite old so death could happen quite often. Immediate reporting to the Secretariat is not needed – it is burdensome to the vessel and flag States. Need to focus on protecting decent working conditions for crew members – instant reporting to Secretariat is not necessary. **CN**: chapeau/(b): support JP. If the language is "report to the Secretariat" then our understanding is that this is annual reporting. **CN**: (d): With regard to the vessel required to return to port, there is a reference to clearance from the port CCM ahead of departure. But this is not necessary. The vessel has returned to port at the request of the flag CCM. So clearance to depart port only relates to the flag CCM not the port CCM. Suggest reference to port CCM be deleted. JP: (d): Agree China. When FV enters or exits from a port – clearance from the port State is necessary. But the essence of this para is that the flag State requires the vessel to enter port until the investigation is completed. Port authorities can control the FV while it is at port – but there is no need to refer to port evidence and the personal effects and quarters of the deceased or missing observer.

4. Paragraphs 3(a), (c) and (h) apply in the event that an observer dies. In addition, the flag CCM shall require that the fishing vessel ensure that the body is well-preserved for the purposes of an autopsy and investigation.

#### International Medical Guide for Ships: untitled (who.int)

What to do (excerpt only) If the dead person was ill on board, consult any records that were made of the nature and course of the illness and the treatment given. ■ If the person was injured, investigate and record the circumstances of the injury or injuries. ■ If the circumstances of death were unusual, sudden, or unknown, or if there is any possibility of criminal intent, a post-mortem examination is indispensable. You may be suspected of concealing a crime if a person is buried at sea under these circumstances: • to preserve the body for examination put it in a body bag and then in a refrigerator or cold-store; • failing this, place the body in a bath in which you have put a large amount of ice. **Only if the ship is** not near a port and the body cannot be kept on board because it poses a risk of infection should you proceed to burial at sea: • seek medical advice to confirm that it is dangerous to keep the body on board and record this advice in the log;

BURIAL AT SEA (excerpt only) Burial at sea should be considered a last resort; always take the body to the next port if you can. The body may be buried at sea if there is no suspicion of foul play and it is not possible to keep the body safely on board, or if the next-of-kin have so requested (be wary of agreeing to requests of this type if you cannot be sure of the cause of death).

7 (a)	(a) immediately ceases [all] fishing operations as soon as practicable;	<ul> <li>CN: As above, "all" should be in [].</li> <li>WWF: Would like to understand the reasoning for not accepting "all" fishing operations to be ceased as soon as practicable. There are already exceptions in other parts of the measure for force majeure and other issues. Leaving it open to interpretation could lead to instances where a man is overboard and it is time sensitive – every second counts to get that individual back on board the vessel. In what circumstances, would there be a fishing operation that could not be terminated in order to save the life of an individual?</li> <li>CN: If "all" fishing operations are to cease, we need a definition of what is a fishing operation. For example, does it include using a sonar to search for a school of fish? Does fishing operation include all activities relating to capture, processing, searching for fish – they all must be ceased? This may not be necessary. We need a definition of "fishing operations" – otherwise it is a problem – deleting "all" might be better.</li> <li>JP: Similar view to CN and CT on use of "immediately" – it may be too strong. Suggest the phrase "as soon as practicable" for para 7 (c). On para 7 (a), ceasing "all" fishing operations. In a hectic situation, it may not be possible to retrieve this gear immediately. Setting fishing lines can be interpreted as fishing operations. In a hectic situation, it may not be possible to cease "all" fishing operations – deleting "all" would avoid confusion and would not damage the purpose of this paragraph.</li> <li>WWF: Appreciate the feedback from China, Chinese, Taipei and Japan. With respect to</li> </ul>	RMI: (a): "as soon as practicable" is the only option given operational requirements. PNG FIA: (a): agree with RMI. CN: (a): "all fishing operations" – the word "all" is not necessary. There may be some processes on board the vessel that can continue to be conducted.	WWF: So what is practicable? Does that mean you can spend the next 2 hours hauling or setting before even looking for a missing crew?

		ceasing "all" fishing operations (7 (a)), CCMs have previously agreed to the same language in CMM 2017-03 on observers. Paragraph 3 of that CMM has the same language. It seems odd to create a different standard for observers from crew on fishing vessels. Struggling to identify a circumstance where human life would not be more important than ceasing fishing operations. <b>CN</b> : Have also checked CMM 2017-03 – and inclusion of ceasing "all" fishing operations. But at that time, there was no Audit Point. Lesson learned from Audit Points – if we continue to use "all" then will be a problem, given different interpretations of what is a fishing operation. Deletion of "all" does not dilute the meaning to rescue the human life. With regard to the existing CMM on observers (CMM 2017-03), CN also considers that "all" is not necessary. If "all" is included, there may be different interpretations by flag CCMs – could be clarified through the Audit Point.

Is there some paragraph that can refer to poor labour conditions? Co-Chair: Advised on the proposal to go with consistent language throughout the text – and these terms are defined in Attachment 2. US: Our preference, as the co-Chair has suggested, is to retain the consistent language throughout the text rather than to add back in terms such as "poor labour conditions". JP: Like the US, JP would like to maintain the wording within the scope for this section, focused on forced labour and other mistreatment. We have discussed the definitions for these terms [Attachment 2], with the definition of mistreatment including the "failure to provide crew members with decent working and living conditions on board fishing vessels". Hope this addresses ID's concern.	there is no inclusion of issues related to crew standards. It needs to be updated – it is currently impossible to recognise information provided through current HSBI practices. US: chapeau: In response to CN, the HSBI questionnaire may not be up to date – but that would be true in response to any new CMM – the HSBI questionnaire needs to be updated and this can be a separate action item – that is not a reason to remove the reference to information obtained through HSBI on crew mistreatment. HSBI can address obligations from any binding CMMs. Not great to remove indicators of forced labour in the latter part of the chapeau paragraph. It is helpful to understand what is meant by "forced labour" – members had expressed a desire to specify these elements. This is going backwards on what was previously agreed. RMI: chapeau: forced labour has clear prescribed indicators which are internationally accepted – listing of detail in this para is unnecessary. Chair: chapeau: Note the eleven ILO indicators of forced labour: Abuse of vulnerability • Deception • Restriction of movement • Isolation • Physical and sexual violence • Intimidation and threats • Retention of identity documents • Withholding of wages • Debt bondage • Abusive working and living conditions • Excessive overtime. CN: chapeau: Not requesting the removal of HSBI – just expressing concern about the old questionnaire. Do we need to also consider use of information obtained from EM as well as observer reports? This information would be useful. Need to make it easy for industry to understand what forced labour looks like – suggest that the eleven indicators are included as an Annex. US: chapeau: fine with addition of EM and observer reports and fine with adding indicators of forced labour to an annex.	<ul> <li>CA: requests that HSBI reports also be included and that we reframe as follows:</li> <li>" In the event that a flag CCM has reasonable grounds to believe, based on credible information such as port state notifications, information provided by a crew member or HSBI reports, that"</li> <li>FFA: Suggest deletion of " such as having been denied access to potable water, adequate food toilets, rest, medical attention, or restriction of movement." 14	This measure will take effect on X January, [2026] [2028].	<ul> <li>CT: There is a lot of text that has not yet been finalized – and it is unclear how much legislation may be required. At this stage, it is better to keep the options for the year for the CMM to take effect in [].</li> <li>US: No new suggestion – but a lot of concern with the idea that we might not have this measure come into effect until 2028, if we are able to get agreement on it by the end of 2024. That would be unacceptable to the US to delay 4 years on a measure that is talking about the health and safety of human beings. I understand that we need to leave the date in []. But 2028 is really not an acceptable target date for implementation.</li> <li>WWF: Support the intervention of the US. I do not think anyone here would suggest that a lot of what is contained in the draft CMM is not already happening. This is really aimed at affecting those who might not be following these rules. So it should not be a huge lift to put this measure in place within a year. This is about basic human welfare – and we should place a priority on this. All of the interventions at the Commission meeting in Rarotonga emphasized the importance of addressing this issue.</li> <li>CT: Appreciate the interventions of US and WWF. To clarify, CT is not suggesting that the measure is not fully implemented until 2028. We just want to ensure that every CCM has sufficient time to conduct the legislation work before this CMM takes effect – to ensure some options and flexibility. We can accept both [2026] or [2028].</li> </ul>	US: 14: Would like reference to "2028" to be [ ] – US does not want three year delay for implementation if the CMM is adopted this year. Would like to have the possibility of the CMM coming into effect at an earlier date.	
ATTACHMENT 1: PARTICULARS THAT MAY BE INCLUDED IN A CREW AGREEMENT			<ul> <li>JP: Have been working on the understanding that this attachment relating to the crew agreement would not be mandatory – but rather voluntary guidelines. That's why we have agreed on para 4 (iii) – where the attachment is referred to as a guideline. Having the attachment as a legal requirement is extremely difficult, almost impossible. If it is insisted, then the attachment would need to be simplified. These guidelines are important – so preference is to retain "may" rather than "shall".</li> <li>US: Want the attachment to be non-binding. This was a deliberate decision in our discussions – to avoid getting bogged</li> </ul>	RMI: Change "MAY" to "SHALL".

		down in the negotiation over what could be binding – but to have these important elements highlighted anyway as something that can be referred to. Down the line, maybe we could look at making it binding. But right now, that would mean looking at all the elements of the attachment all over again. Don't want to get in the middle of individual private contracts – encourage them to remain non-binding. Would over-complicate things. <b>CN</b> : Current practice for CN tuna vessels – there are three contracts for non-national crew. (i) between foreign crew and foreign manning company; (ii) between Chinese manning company and foreign manning company; and (iii) between Chinese manning company and Chinese fishing company. It is very difficult to reach agreement on this Attachment. Support JP and US on it being non-binding. <b>CT</b> : echo comments. In previous discussions, clear that CCMs need flexibility to implement the CCM in different ways. Every CCM should be able to implement. If the attachment is mandatory, we will need to look at it again – prolong the discussion. <b>RMI</b> : disappointing. The attachment provides the very basics of a contract – minimum 20 elements. It is a contract that those involved as crew should expect. Wanted it compulsory. Reality that many crew members change vessels through carrier vessels.
