JT,

We have got parallel email trails here so am putting status update on the response and direction you have given.

Best regards,

Gaurav Rathore

-
1. Take few empty containers for temporarily loading bulk from store for breathing space and production storing. **Approved**. *We already have 3 containers at the factory which are being loaded with finished goods and have 2 more containers reaching later tonight. We will have 2 more containers reach us tomorrow where in they would also be used for temporary storage.*
 2. Arranging wooden pallets; chemical treated pallets will take more than 20 days .So proceeding with existing type pallets for the immediate requirement of 150

numbers. **Approved** . *We have worked out local sourcing where he has committed to delivering treated pallets next week. This order will be confirmed tomorrow with a meeting with the vendor*

3. Recommended to reduce daily purchase only to the urgent shipments and utilize bulk from store for add on shipments. **Wait for response from Joa** . *We have reduced it to 25 tons already and would work this out with Jacob ad Joan's advice*
4. Metro re-packing starting today, we have immediate shipment order for 4 fcls. *When will this ship . We are targeting to have the first one shipped out on Sunday and at least 2 more within the next week as the packing material is expected on this Saturday (10/20)*
5. QA rejected items other than smell can be utilized for Neptune order. This can be done once cases identified and segregated. **Do it . what are we waiting for ?** *Their representative has seen the material and accepted; we will process it based on the cooker availability.*
6. Recommended sell DC (smell)locally in better price and that will give some free space in the cold store. This will be confirmed by QA and non-exportable item only will sell locally. I have asked Ous to talk Sre-Agent to give his best price. Seb also working with few others. Party will be confirmed based on better price. **Approved . I need to see fast actions . you all put me into this situation which is unpardonable . I will never forgive this !!!**
7. Oscar item and quantity stock will be given by QA dept. I will propose and guide shipment break-up based on mpo. **Go ahead**

Allocation of separate team and workforce for re-packing from cold store. **You don't need my permission . this is your job.** *This has been organized from the beginning of this week and at work (extra boys for cold store and workforce for packing)*
